

City of Wenatchee Parks, Recreation and Cultural Services Department Living Memorial Tree Program

Thank you for your interest in the Living Memorial Tree Program. A tree can be a fitting memorial for a loved one or special moment in time you wish to remember such as commemorating a special date such as a birthday or anniversary or honoring a person, event or organization.

Your living memorial will be enjoyed by future generations and will beautify your community's parks while standing tall and strong as a tender remembrance. It is not only a gift for today but also a lasting contribution to the beauty and variety of the park landscape. It can help clean the air, control erosion, ease noise pollution and provide a safe haven for wildlife.

HOW TO PARTICIPATE:

Complete the attached application form and return it to the City of Wenatchee Parks, Recreation and Cultural Services Department.

Department staff will contact you to discuss your preferred tree type and potential locations. Once payment is received by the City, we will purchase and plant the tree at the chosen site during the earliest possible season in which the tree's species can be planted most successfully.

You will receive a certificate from the Wenatchee Parks, Recreation and Cultural Services Department commemorating the living memorial and a map showing the general location of your tree.

Your tree will be identified in the park with a 4 inch by 6 inch brass marker installed near its base. The marker will designate the memorial and both the common and botanical names of the tree so it can also serve as a member of the City Arboretum.

The cost of the tree is \$362.25 and includes the planting, site preparation and memorial marker.

The following categories of trees may be selected:

Shade Trees

These trees provide large canopies, and usually reach or exceed heights of 50 feet. Trees are 2-3" caliper (trunk size when planted).

Ornamental Trees

These trees generally exhibit interesting branching habits and features of unique foliage. They range in height from 20 to 50 feet. Trees are 2-3" caliper (trunk size when planted).

Evergreen Trees

These trees have needle-like or scale-like leaves, which remain on most species year round, and are pyramid shaped. They grow to a height exceeding 50 feet. Planted size ranges from 4 to 6 feet high.
